

Q. 1

A company has multiple subscriptions.

They want to create resources in the different subscriptions.

Is it possible to create resources in multiple subscriptions?

☐ Incorrect

☐ Correct

[Report Error](#)

Q. 2

A company wants to start using Microsoft Azure.

They want to make use of availability zones within Azure.

If they deploy resources across all regions in Azure, can they make use of availability zones in all regions in Azure?

☐ Incorrect

☐ Correct

[Report Error](#)

Q. 3

A company is planning on creating resources for different departments within Microsoft Azure.

They want to ensure that they get the bills by the departments.

Which of the following should you consider implementing for this requirement?

☐ Azure Monitor

☐ Azure locks

☐ Azure Tags

☐ Azure Advisor

[Report Error](#)

Q. 4

A company has a virtual machine defined as demovm. This Virtual Machine was created with the standard settings. An application is installed on demovm. It now needs to be ensured that the application can be accessed over the Internet via HTTP.

You modify the Network Security Groups.

Would this solution fit the requirement?

☐ No

☐ Yes

[Report Error](#)

Q. 5

A company is looking at the possibility of using Azure Government for development of their cloud-based solutions.

Which of the following customers are allowed to use Azure Government?

Choose 2 answers from the options given below

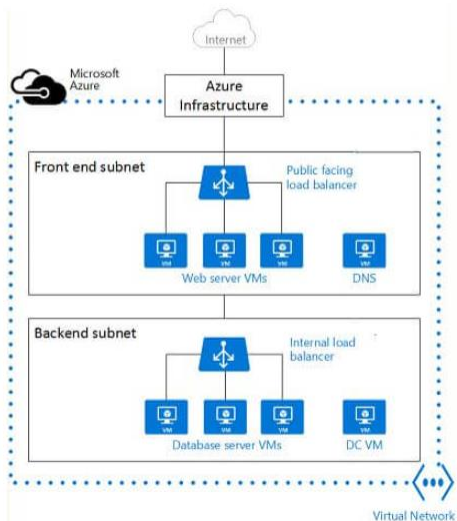

- ☐ A Canadian Government Contractor
- ☐ A European Government Contractor
- ☐ A United States Government entity
- ☐ A European Government entity
- ☐ A United States government Contractor

[Report Error](#)

Q. 6

A company is planning on deploying a web server and database server as shown in the architecture diagram below. You have to ensure that traffic restrictions are in place so that the database server can only communicate with the web server.

Which of the following would you recommend for implementing these restrictions?

- ☒ A Virtual Private Gateway
- ☐ A local network gateway
- ☐ Network security groups (NSGs)
- ☐ Azure Service Bus

[Report Error](#)

Q. 7 A company wants to make use of an Azure service in private preview. Are Azure services in private preview available to all customers?

☐ Yes

☐ No

[Report Error](#)

Q. 8

A company has 100 machines in their on-premise environment. They want to extend their infrastructure without too much extra capital or operational expenditure.

Which of the following could they opt to carry out for this requirement?

☐ Move just 50 machines to the public cloud

☐ Have a hybrid architecture

☐ Migrate all to the public cloud

☐ Move all to the private cloud

[Report Error](#)

Q. 9 A company is planning on setting up an Azure account. Can they purchase multiple Azure subscriptions and tie them to the single Azure account?

☐ No

☐ Yes

[Report Error](#)

Q. 10

Your organization deployed three identically configured web servers (Tomcat) hosted on virtual machines (VMs) in a subnet named Subnet-WebSvr on a virtual network named VNet-US-East.

What would you recommend that the security administrator implement to protect inbound access to the VMs?

☐ NSG

☐ DDoS

☐ CDN

☐ IoT Hub

[Report Error](#)

Q. 11 Correct or Incorrect: Azure Blueprints makes it possible for development teams to rapidly build and stand up new environments.

☐ Incorrect

☐ Correct

[Report Error](#)

Q. 12 Your organization allows developers to provision their own virtual machines (VMs) in Azure. You need to ensure that developers deploy only approved VM sizes to the corporate subscription. Which of the following will meet this requirement?

☐ Azure AD Connect

☐ Azure Policy

☐ Azure IoT Edge

☐ Azure VPN

[Report Error](#)

Q. 13

A company plans to purchase an Azure Support plan. Below is a key requirement for the support plan

Ensure that for high severity cases, there is a minimum initial response time of 10 minutes

A recommendation is made to purchase the Basic Support plan Would this recommendation fulfill the requirement?

☐ Yes

☐ No

[Report Error](#)

Q. 14 A company wants to make use of an Azure service in public preview. Are Azure services in public preview available to all customers?

☐ Yes

☐ No

[Report Error](#)

Q. 15

A company has a set of Virtual machines defined in Azure. One of the machines was down due to issues with the underlying Azure Infrastructure.

The server was down for an extended period of time and breached the standard SLA defined by Microsoft.

How will Microsoft reimburse the downtime cost?

- ☐ By providing service credits to the customer
- ☐ By directly sending money to the customer's bank account
- ☐ By providing a service free of cost to use for a specific duration of time.
- ☐ By spinning up another Virtual Machine free of cost for the client

[Report Error](#)

Q. 16 A company needs to deploy several virtual machines. Each of these virtual machines will have the same set of permissions. To minimize the administrative overhead, in which would you deploy the Azure Virtual Machines?

- ☐ Azure Policies
- ☐ Azure Virtual Machine Scale sets
- ☐ Azure Tags
- ☐ Azure Resource Groups

[Report Error](#)

Q. 17

Your company has 10 offices. You plan to generate several billing reports from the Azure portal. Each report will contain the Azure resource utilization of each office.

Which Azure Resource Manager feature should you use before you generate the reports?

- ☐ Azure locks
- ☐ Azure Monitor
- ☐ Azure tags
- ☐ Azure Advisor

[Report Error](#)

Q. 18 What data or information does Azure Information Protection (AIP) encrypt?

- ☐ Network traffic into and out of Azure to an organization's data center(s)
- ☐ Documents and email messages
- ☐ Azure Cosmos DB data
- ☐ Azure Blob storage

[Report Error](#)

Q. 19

A company needs to create a set of resources within Microsoft Azure.

For IT Administrators, there is a requirement in which they may only create resources in a certain region.

Which of the following can help achieve this?

- ☐ Azure Resource Groups
- ☐ Azure Tags
- ☐ Azure Locks
- ☐ Azure Policies

[Report Error](#)

Q. 20

A company is planning on using the Microsoft Azure Content Delivery Service.

Which of the following is the right cloud concept to which the Azure Content Delivery service belongs to?

- ☐ Function as a service (FaaS)
- ☐ Software as a service (SaaS)
- ☐ Infrastructure as a service (IaaS)
- ☐ Platform as a service (PaaS)

[Report Error](#)

Q. 21 Correct or Incorrect: Azure application security groups only inspect east-west (or lateral) traffic and cannot be used to inspect north-south traffic.

- ☐ Incorrect
- ☐ Correct

[Report Error](#)

Q. 22

Your organization plans to migrate its on-premises SQL Server database to Azure. You need to recommend a PaaS solution that gives developers greater control over the underlying database virtual server.

Which Azure resource should you recommend?

- ☐ Azure SQL Database Managed Instance
- ☐ Azure Synapse Analytics
- ☐ SQL Server in an Azure virtual machine
- ☐ Azure SQL Database

[Report Error](#)

Q. 23 What is illustrated in the highlighted section of the following screen?

The screenshot shows the Azure portal interface. At the top, there's a row of icons for various services: 'Create a resource', 'Service Health', 'Resource groups', 'Tags', 'Subscriptions', 'Machine Learning Studio', 'Machine Learning', 'Cost Management', 'Application Insights', and 'More services'. Below this is a 'Recent resources' table with columns 'Name', 'Type', and 'Last Viewed'. The table contains one entry: 'RG-Global' of type 'Resource group' viewed '24 hours ago'. At the bottom, there's a 'Navigate' section. A red box highlights a terminal window titled 'PowerShell' which shows the Azure Cloud Shell interface. The terminal text includes: 'Initializing your account for Cloud Shell...', 'Requesting a Cloud Shell.Succeeded.', 'Connecting terminal...', 'Welcome to Azure Cloud Shell', 'Type "az" to use Azure CLI', 'Type "help" to learn about Cloud Shell', 'MOTD: Save files to \$home/cloudrive for persistence across sessions', 'VERBOSE: Authenticating to Azure ...', 'VERBOSE: Building your Azure drive ...', and the prompt 'PS /home/akhil>'.

- ☒ Azure Cloud Shell
- ☐ Azure CLI
- ☐ Azure privilege access management
- ☐ Azure Bash script

[Report Error](#)

Q. 24 An organization plans to deploy numerous virtual machines on Azure. Which Azure storage service should be used to store the data disks of the virtual machine?

☐ Block Blobs

☐ Files

☐ Cosmos DB

☐ Page Blobs

[Report Error](#)

Q. 25 Which of the following is a cloud platform for creating and managing machine learning models?

☐ Azure Events

☐ Azure Machine Learning

☐ Azure IOT Hub

☐ Azure AI Engine

[Report Error](#)

Q. 26 Correct or Incorrect: Azure PowerShell can be installed on Linux, Windows, and macOS.

☐ Correct

☐ Incorrect

Q. 31 What three elements does a role assignment consist of?

☐ Role definition

☐ Security principal

☐ Services

☐ Scope

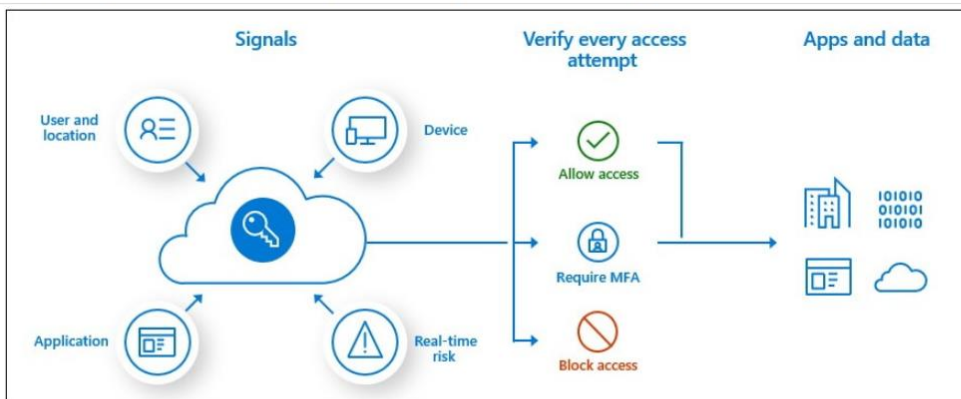

Report Error

Q. 32 An organization has multiple virtual machines hosted in its Azure environment. As per the organization's information security (InfoSec) policy, there is a requirement to limit the amount of inbound traffic to all the Azure VNets. Which of the following enables inbound traffic filtering?

- ☐ Azure VPN Gateway
- ☐ Azure Hybrid DC on-premise firewall
- ☐ Azure CDN
- ☐ Azure Firewall

Report Error

Q. 33 In conjunction with Azure MFA, what is illustrated in the following figure?

- ☐ Network Security Groups (NSGs)
- ☐ Conditional access
- ☐ User set restrictions
- ☐ Azure Firewall

Report Error

Q. 34 Correct or Incorrect: When you apply a lock at a parent scope, all resources within that scope inherit the same lock.

- ☐ Correct
- ☐ Incorrect

Report Error

Q. 35 Which of the following issues is NOT resolved by leveraging Azure Key Vault?

- ☐ Firewalling access to VNet resources
- ☐ Storing secrets backed by hardware security modules
- ☐ Secrets management
- ☐ Certificate management

[Report Error](#)

Q. 36 Correct or Incorrect: Azure Government uses the same underlying technologies as Global Azure.

- ☐ Incorrect
- ☐ Correct

[Report Error](#)

Q. 37 Your organization operates its line-of-business (LOB) applications hosted on virtual machines (VMs) running in Azure. You want to configure just-in-time VM access in Azure Security Center to protect the VMs against unauthorized access attempts. What should you do first?

- ☐ Enable guest diagnostics on all VMs.
- ☐ View the VMs' secure score in Azure Security Center.
- ☐ Configure Azure Security Center to run at the Standard tier.
- ☐ Ensure that the VMs reside on the same virtual network.

[Report Error](#)

Q. 38 Correct or Incorrect: If an organization has multiple Microsoft Azure subscriptions, and the new CIO wants the head of IT to consolidate all subscriptions, the head of IT can transfer the billing ownership of multiple Azure subscriptions to one Azure subscription.

- ☐ Correct
- ☐ Incorrect

[Report Error](#)

Q. 39

Correct or Incorrect: Your organization plans to migrate its on-premises SQL Server databases to Azure SQL Database. You need to apply your local software assurance licenses to Azure SQL Database to realize a discount.

You can apply Hybrid Use Benefit for Azure SQL Database.

☐ Incorrect

☐ Correct

[Report Error](#)

Q. 40

Your organization uses IaaS and PaaS services in Azure. You need to track resource spending for all resources across resource groups and subscriptions.

Which Azure Resource Manager feature should you use?

☐ Resource locks

☐ Taxonomic tags

☐ Management groups

☐ RBAC

[Report Error](#)

Q. 41

An organization plans to migrate its data center infrastructure footprint to Azure. The IT administrator has been asked to gain familiarity with Azure Resource Manager (ARM).

Which of the following would you create first in Azure?

☐ Virtual machines

☐ Management group

☐ Azure subscription

☐ Resource group

[Report Error](#)

Q. 42

You manage an Azure resource group named RG-Global for your organization. The corporate billing department asks you for cost and consumption data from RG-Global.

You associate the appropriate taxonomic tags with the RG-Global resource group. What other action is required?

- ☐ Apply the tags to the enclosed resources individually.
- ☐ No further action is required.
- ☐ Apply the tags at the management group level.
- ☐ Apply the tags at the subscription level.

[Report Error](#)

Q. 43 Correct or Incorrect: If you have never tried or paid for Azure before, you're eligible for an Azure Free account.

- ☐ Incorrect
- ☐ Correct

[Report Error](#)

Q. 44 Correct or Incorrect: In Azure, inbound data transfers are free.

- ☐ Incorrect
- ☐ Correct

[Report Error](#)

Q. 45

You plan to deploy a line-of-business application in Azure that consists of the following resources:

- App Service web app
- Azure SQL Database
- Azure Cache for Redis

You need to track resource cost for the environment as efficiently as possible. How should you organize the resources?

- ☐ Deploy to the same App Service plan
- ☐ Deploy to the same resource group
- ☐ Deploy to the same region
- ☐ Deploy using the same deployment template

[Report Error](#)

Q. 46 Which of the following is the deployment and management service for Azure?

☐ Azure Resource Manager

☐ Azure Availability Zone(s)

☐ Azure Region

☐ Azure VM

[Report Error](#)

Q. 47

Your organization has all its IT infrastructure running in Azure IaaS and PaaS services. You need Azure to proactively notify you of potential cost savings opportunities on an ongoing basis.

Which Azure product should you use?

☐ Azure Log Analytics

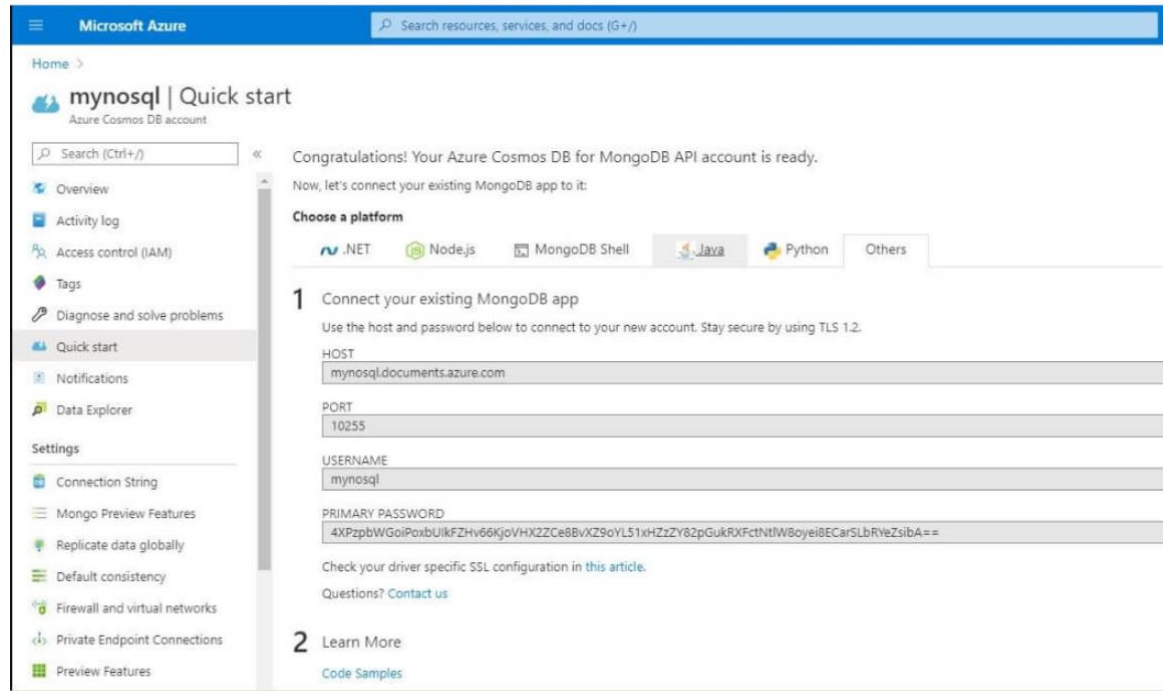

☐ Azure Application Insights

☐ Azure Advisor

☐ Azure Monitor

[Report Error](#)

Q. 48 Which Azure DB service is portrayed in the following screen?

☐ Azure managed SQL instances

☐ Azure SQL Server 2016

☐ Azure Cosmos DB

☐ Azure NoMySQL

[Report Error](#)

Q. 49

A company wants to host an application within Microsoft Azure.

The application connects to a database in Azure.

The company would like to store the database password in a secure location.

You recommend the usage of the Azure Key Vault for storage of the password.

Would this fulfill the requirement?

☐ Correct

☐ Incorrect

[Report Error](#)

Q. 50

A company wants to host an application within Microsoft Azure.

The application connects to a database in Azure.

The company to store the database password in a secure location.

You recommend the usage of the Azure Security Center for storage of the password.

Would this fulfill the requirement?

☐ Incorrect

☐ Correct

[Report Error](#)

Q. 51

A company wants to host an application within Microsoft Azure.

The application connects to a database in Azure.

The company to store the database password in a secure location.

You recommend the usage of the Azure Advisor for storage of the password.

Would this fulfill the requirement?

☐ Correct

☐ Incorrect

[Report Error](#)

Q. 52

A company needs to connect their on-premise data center to an Azure Virtual Network using a Site-to-Site connection.

Which of the following would you create as part of this implementation?

☐ Virtual Network Gateway

☐ Virtual Network

☐ Application Gateway

☐ Load Balancer

[Report Error](#)

Q. 53

A company is planning on setting up a private cloud network.

Which of the following is an advantage of setting up a private cloud network?

- ☐ A Private Cloud environment can only support an Infrastructure as a service model
- ☐ The Private Cloud environment can be rolled out to select users
- ☐ The Private Cloud environment can be rolled out to the general public
- ☐ A Private Cloud environment can only support a Platform as a service model

[Report Error](#)

Q. 54

An application consists of a set of virtual machines hosted in a Virtual Network.

In a month, the application seems to have a load of around 20% for 3 weeks.

During the last week, the load on the application reached 80%.

Which of the following concept would you implement to ensure least cost and efficiency of the underlying application infrastructure?

- ☐ High availability
- ☐ Disaster recovery
- ☐ Elasticity
- ☐ Fault tolerance

[Report Error](#)

Q. 55 An organization has an information security policy in place that mandates protection of the organization's Azure environment against known and unknown threats. Which of these solutions best fits the requirements?

- ☐ Conditional Access policies
- ☐ Azure Advanced Threat Protection
- ☐ Azure Information Protection (AIP)
- ☐ Azure MFA Server

[Report Error](#)

Q. 56

Your organization plans to run all its IT operations from Azure. The corporate security team needs a platform from which it can respond to incidents rapidly and investigate security threats by using artificial intelligence (AI).

What Azure product should you recommend to the security team?

☐ Azure Security Center

☐ Azure Monitor

☐ Azure Log Analytics

☐ Azure Sentinel

[Report Error](#)

Q. 57 Which Azure product is shown in the following screen?

Q. 58

An organization is adopting public cloud services, and Azure has been selected as a cloud of choice. The information security team has expressed concern about possible exposure of administrative credentials during the deployment and operations phases.

Which of the following Azure solutions enables encryption of the administrative credentials?

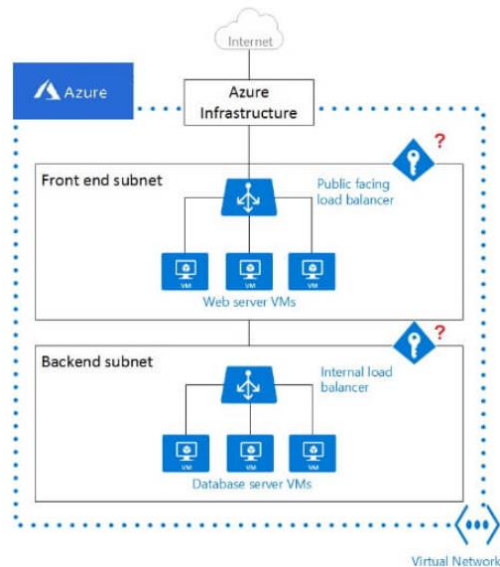

- ☐ Azure Multi-Factor Authentication (MFA)
- ☐ Azure Key Vault
- ☐ Azure Information Protection
- ☐ Azure Sentinel

[Report Error](#)

Q. 59

Your organization has deployed an Azure VNet with two subnets hosting the front-end web server VMs and back-end database server VMs, as shown in the following diagram. The security administrator is mandated to filter traffic coming from the Internet as well as between the front-end subnet and the back-end subnet, based on IP addresses.

What is represented by ? in the figure?

- ☒ Azure network security groups (NSGs)
- ☐ VPN gateway
- ☐ Azure Security Center
- ☐ Proxy endpoint

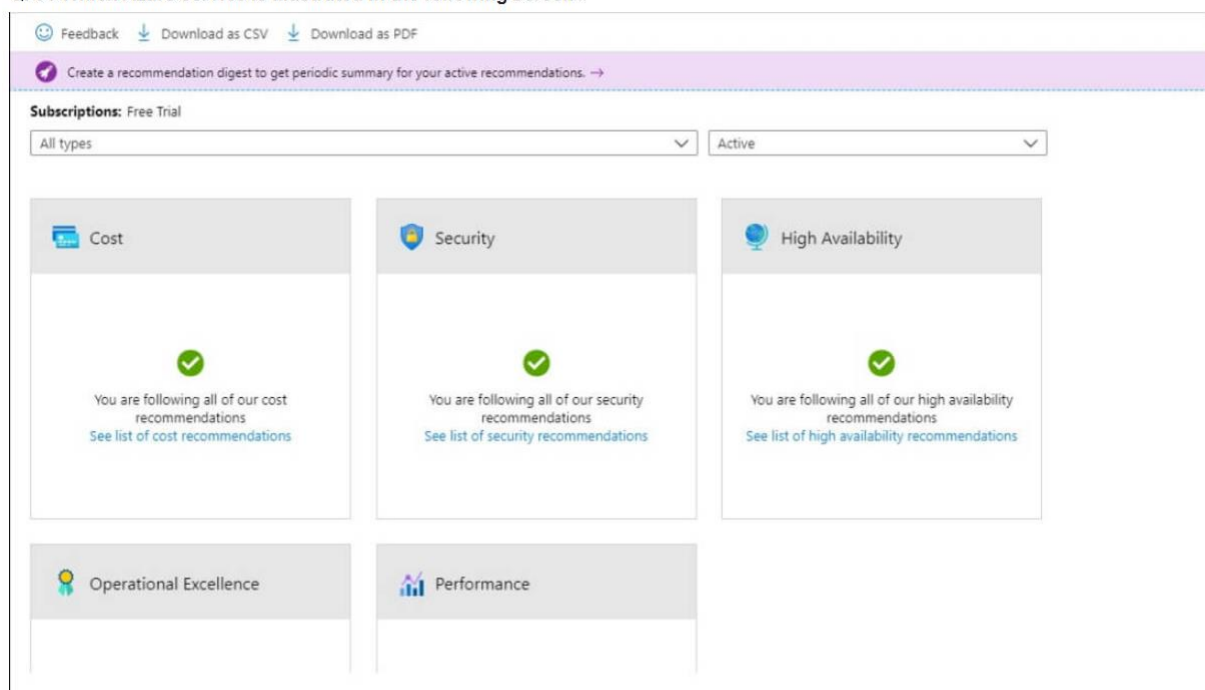

[Report Error](#)

Q. 60 In Microsoft Azure, an application can connect to which of the following Azure resources for retrieving secrets, keys, and certificates?

- ☐ Azure Key Vault
- ☐ Encrypted Blob storage
- ☐ Azure Active Directory (Azure AD)
- ☐ Dedicated certificate store

[Report Error](#)

Q. 61 Which Azure service is illustrated in the following screen?

- ☐ Azure TCO Calculator
- ☐ All of these
- ☐ Azure Security Center
- ☒ Azure Advisor

[Report Error](#)

Q. 62

A company wants to setup resources within Microsoft Azure.

They want a way to manage identities within Azure.

Which of the following is used as an Identity Management solution in Azure?

- ☐ Azure AD
- ☐ Azure Security Center
- ☐ Azure Advisor
- ☐ Azure Monitor

[Report Error](#)

Q. 63

You are planning on setting up a Microsoft Azure Free account.

Which of the following is not true when it comes to what is offered with an Azure Free account?

- ☐ Access to certain products that are always free
- ☐ 200 USD free credit to use for 30 days
- ☐ Free access to certain Azure products for 12 months
- ☐ Free access to all Azure products after the 12 month expiration period

[Report Error](#)

Q. 64

Fill in the blank with the correct Azure service to correctly complete the statement below:

_____ is a simplified tool to build intelligent Artificial Intelligence (AI) applications.

- ☐ Azure Application Insights
- ☐ Azure DevOps
- ☐ Azure Cognitive Services
- ☐ Azure Advisor

Q. 65

A company is planning on setting up a solution within Microsoft Azure.

The solution would have the following key requirement:

- Uses past training's to provide predictions that have high probability

Which of the following would be best suited for this requirement?

☐ Azure Functions

☐ Azure Machine Learning

☐ Azure IoT Hub

☐ Azure AI Bot

[Report Error](#)

Q. 66

A company is planning on setting up a solution within Microsoft Azure.

The solution would have the following key requirement:

- Provide an efficient way to distribute web content to users across the world

Which of the following would be best suited for this requirement?

☐ Azure Load Balancer

☐ Azure SQL Datawarehouse

☐ Azure HD Insight

☐ Azure Content Delivery Network

[Report Error](#)

Q. 67

A company is planning on setting up a solution within Microsoft Azure.

The solution would have the following key requirement:

- Provide the ability to distribute user traffic to a set of backend Virtual Machines

Which of the following would be best suited for this requirement?

- ☐ Azure SQL Datawarehouse
- ☐ Azure Content Delivery Network
- ☐ Azure Load Balancer
- ☐ Azure HD Insight

[Report Error](#)

Q. 68

A company is planning on setting up a solution within Microsoft Azure.

The solution would have the following key requirement:

- Provide a cloud service that makes it easy, fast, and cost-effective to analyse massive amounts of data.

Which of the following would be best suited for this requirement?

- ☐ Azure SQL Datawarehouse
- ☐ Azure Content Delivery Network
- ☐ Azure Load Balancer
- ☐ Azure HD Insight

[Report Error](#)

Q. 69

A company is planning on hosting a set of resources within their Microsoft Azure subscription.

They are currently aware that most Azure Services can provide an SLA of 99.9%.

Which of the following technique could be used to increase the up-time for resources hosted in Azure?

- ☐ Adding resources to multiple regions
- ☐ Adding resources to the same resource group
- ☐ Adding resources to the same data center
- ☐ Adding resources to the same subscription

[Report Error](#)

Q. 70

A company is planning on creating several SQL Databases within Microsoft Azure.

They would be using the Azure SQL Database service.

Which of the following is the right category to which the Azure SQL Database service belongs?

- ☐ Function as a service (FaaS)
- ☐ Software as a service (SaaS)
- ☐ Platform as a service (PaaS)
- ☐ Infrastructure as a service (IaaS)

[Report Error](#)

Q. 71

A company is planning on using Azure Storage Accounts. They have the following requirement:

- Storage of 2 TB of data
- Storage of a million files

Would using an Azure Storage Account fulfill these requirements?

- ☐ Correct
- ☒ Incorrect

[Report Error](#)

Q. 72

A company wants to make use of Microsoft Azure to deploy various business solutions.

They want to ensure that suspicious attacks and threats to resources within their Microsoft Azure account are prevented.

Which of the following helps prevent such attacks by using built-in sensors in Azure?

- ☐ Azure Advanced Threat Protection
- ☐ Azure AD Identity Protection
- ☐ Azure DDoS attacks
- ☐ Azure privileged identity management

[Report Error](#)

Q. 73

A company is planning on hosting resources within Microsoft Azure.

They want to ensure that Azure complies with the rules and regulations of the region for hosting resources.

Which of the following can assist the company in getting the required compliance reports?

- ☐ Azure Advisor
- ☐ Azure AD
- ☐ Azure Security Center
- ☐ Microsoft Trust Center

[Report Error](#)

Q. 74

A company has just deployed a set of Virtual Machines (VMs) to host a production software for their end users.

The company needs to have a solution that will allow them to know the health of their VMs at all times so they can implement alerts and redundancy.

Which solution would best fulfill this need for the company?

- ☐ Azure Monitor
- ☐ Azure AD
- ☐ Azure Power BI
- ☐ Azure Advisor

[Report Error](#)

Q. 75 A company is planning on setting up a private cloud network. Which of the following is an advantage of setting up a private cloud network?

- ☐ Different departments in your organization can have a segmentation of resources defined in Azure
- ☐ The private cloud can be rolled out to select users
- ☐ All users across the world can access the resources in your Azure account
- ☐ You pay a capital upfront cost when using resources in the public cloud

[Report Error](#)

Q. 76

A company is planning on setting up a solution within Microsoft Azure.

The solution would have the following key requirement:

- Provides serverless computing functionalities

Which of the following would be best suited for this requirement?

- ☐ Azure AI Bot
- ☐ Azure IoT Hub
- ☐ Azure Machine Learning
- ☐ Azure Functions

[Report Error](#)

Q. 77

A company has a number of resources hosted within Microsoft Azure.

They want to push all the events from various resources into a centralized repository so that the events can be correlated later on.

Which of the following services would you use for this requirement?

- ☐ Azure Event Hubs
- ☐ Azure Advisor
- ☐ Azure Analysis Services
- ☐ Azure Log Analytics
